**DETAILED ACTION**

***Allowable Subject Matter***

Claims 1-18 and 20-33 are allowed.

The following is an examiner's statement of reasons for allowance:

The system/method disclosed by Portilla teaches storing the conversion table on the network server (central computer 40, column 3, lines 20-24). Therefore, it is the network server that performs conversion from a first language to a second language using the conversion table. The server then "punts" the converted "information element" (i.e. a word or phrase) to one of the computer units 20. The computer units 20 do not store a conversion table in the system/method of Portilla.

Independent claim 1 requires at least one of the plurality of computers (other than the network server) comprising a conversion table to receive the selection of a word or phrase, convert the word or phrase into a unique key using the conversion table and to transmit the unique key to the server. Since the system/method of Portilla performs all conversions on the network server (central computer 40), Portilla does not teach, and does not reasonably suggest, storing a conversion table on one of the plurality of computers (computer units 20) for converting a selected phrase to a unique key value and sending the unique key value to the server. Thus, claims 1-18 are allowed.

Independent claim 22 requires the network server transmits a unique key value to a second one of the computers. As discussed above, Portilla discloses all conversions are performed on the server (central computer 20) and the converted

information elements (i.e. words or phrases) are "punted" to a second one of the computers. Thus there is no teaching or suggestion of transmitting a unique key value (rather than the phrase associated with the unique key value) to a second one of the computers.

Similarly, independent claims 26 and 28-33 each require at least one of the plurality of computers (other than the network server) to comprise a conversion table having a plurality of words or phrases corresponding to a language key and a unique key value. Since the system/method of Portilla performs all conversions on the network server (central computer 40), Portilla does not teach, and does not reasonably suggest, storing a conversion table on one of the plurality of computers. Thus claims 26-33 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
